

REVERSE AGEING, HEAL CHRONIC DISEASE, BOOST BRAIN FUNCTION & IMMUNE SYSTEM

and can cause progressive 'wounding'

In his book, *The Oxygen Revolution*, Dr. Paul G. Harch expresses that hyperbaric oxygen therapy will "likely become most appreciated by those Baby Boomers whose life spans have been compromised by years of drug experimentation in the 1960s and 1970s." Wounds in the brain register as areas of low blood flow and low oxygenation, which cause decreased neurological function. Most commonly, this decreased neurological function leads to the premature ageing diagnosis we call **dementia**.

Dr. Harch calls HBOT a

“Generic drug for repair of brain wounds.”

The stereotypic chronic brain wound typically responds well to low pressures of hyperbaric oxygen treatments. What Drs. Neubauer, Harch, and others have shown in the past 30 years is that these premature ageing wounds can be repaired for improvement neurologically, cognitively, behaviourally, and emotionally.

Repairing these chronic wounds is considered by many to be a reversal of premature ageing by use of HBOT, aiding in prolonging longevity and an enhanced quality of life.

Considering that it delivers a natural substance which helps your body repair itself and has many significant healing benefits, including **mending your DNA, boosting your immune system, repairing brain wounds from chronic stress, increasing energy production and much more**, you should choose *Hyperbaric Oxygen Therapy* as a healing tool.

How does Hyperbaric Oxygen Therapy heal you at the cellular level?

We all know drugs and surgeries are useful to a certain extent, but we know better that they don't heal our body by re-growing and re-vitalizing what has diminished within us as a result of stress, ageing, inflammation and chronic diseases.

In today's Quantum medicine, there is a therapy that is proven to offer powerful healing benefits through **healing and regrowth of damaged cells: Hyperbaric Oxygen Therapy (HBOT)**, as noted in Desert Health's lead story by Dr. Andrews' discovery.

In HBOT, you breathe in concentrated oxygen while the pressure of the treatment chamber is slowly increased. Pressurised oxygen is delivered into the chamber, which increases the pressure of oxygen within your body as much as 15 times normal tissue saturation. Each cell is literally saturated with pure oxygen, accelerating the body's natural healing processes.

Oxygen therapy can help to jump start your body's antioxidant defences, boost metabolism, and counteract low oxygen levels that lead to sluggish cell activity and oxidative stress. Research has shown that it can also help to **improve the efficiency of haemoglobin** in transporting oxygen around the body; **improve blood flow** by helping to keep cell membranes

flexible; **suppress inflammation**; and **detoxify and fight infection** by destroying bacteria, viruses, parasites and fungi that thrive in low oxygen environments. Hence, HBOT is the most effective healing tool to assist healing from all types of **infections**.

HBOT is also commonly used in treating many **age-related diseases and conditions** such as **stroke, rheumatoid arthritis and cancer treatment recovery**.

In addition to its often lifesaving work in the medical industry, HBOT is gaining widespread recognition for its success in treating a breadth of cosmetic concerns. Regular treatment is widely thought to increase **ageing skin** elasticity and to stimulate **collagen production**, which, over time, can improve skin texture and reduce the appearance of fine lines, wrinkles, and scars. Plastic surgeons often prescribe the therapy to enhance recovery from **reconstructive surgery**. But true ageing goes beyond those fine lines and wrinkles.

Scientists have found that the chromosomes in our cells progressively shorten each time the cell divides. Eventually, the chromosomes can shorten no further and stop dividing. When this happens, the cells become senescent (sleepy) and die. In premature ageing, the lifespan is shortened due to the effects of various stressors to the human body. The most obvious, and often the most common, are alcohol, tobacco, chemical drugs and stress hormones. These substances have a tremendous ageing effect on the human body

QUANTUM HEALING
- CENTER -

How to fight **FATIGUE**, prevent **AGEING** and recover from **INJURY** **WITHOUT MAKING ANY EFFORT?**

Do you know that you can now just lie and sleep in an oxygen rich chamber for one hour and healing takes place spontaneously for you? Imagine that.

Countless studies done by health experts including world's leading neurosurgeons have validated the amazing health benefits of healing and regrowth of **damaged cells** through **Hyperbaric Oxygen Chamber**.

We are please to inform you that our centre has the **largest** and the **most advanced** mild hyperbaric oxygen medical treatment unit in Australia, and in the world. Our treatment cabin can be comfortably shared by 2 - 3 people.

We are now offering fantastic **Treatment Packages & Gift Vouchers** for the local community. We look forward to sharing this new exciting healing technology with you.

\$20

Present this Voucher at the **Quantum Healing Center** and redeem for \$20 for your first session. Exp: 31/03/2016
